If you are as
particular about
the style of your

SHOES

as you are about the style of
your suits, you will appreciate
the really new styles in our
shoe department. To see
them is to arouse a de-
sire to buy a pair.

HARVEY MURPHY

FRANK - - BLAIRMORE

Local and General

DIED—At Coleman, of natural
drowning, Billy, the month-old
son of T. B. Brandon.

Messrs. H. B. Herrin and F. W.
Doubt have taken over the livery
business until recently conducted by
W. O. Robertson, and have added
several fine horses to the fleet.

Arrangements are being made for
grand concert to take place on the
13th of July, announcement of which
will be made later.

We want correspondents in all the
neighboring towns and will consider
any proposition as to returns, etc.
This paper is to be made representa-
tive of the whole district, and it is
impossible to accomplish such with-
out some co-operation on the part
of the public.

Repairs are being effected to the
bridges between Frank and Lillie.

Two lads were up before the court
at Frank on Monday, on the charge
of being drunk and disorderly, and
fined \$10 and costs.

Coyotes are at present plentiful
between Burnis and Lundbreck, and
some have ventured very near
travelers in that section.

Some good fishing was had the
beginning of the week down the
South Fork of the Old Man river,
two fishers returning with 180 for one
day's catch.

New telephone lines are being
extended to new sections of the town
that are rising to importance.

The secretary of the Leithbridge
R. O. E. football executive has re-
ceived a communication from
Frank, asking that the R. O. E. E.
football team travel to Blairmore on
the evening of July 27th and
participate in a cup tournament with
Bellevue, in view of the excellent
showing made by these two teams in
their game at Cowley on May 24th.
The cup for the winners of the tour-
nament is being put up by the
Fischer Creek Golf Association.

Talk about big countries—the
forest reserves that have just been
set apart in Alberta, are just the size
of the kingdom of Denmark, and as
large as the kingdoms of Holland
and Belgium put together and one
quarter of the area of England and
Wales. Yet Alberta never misses
them—Albertans.

The big Mercantile Store, formerly
occupied by A. B. Hames, is being
fitted up as a temporary opera
house.

If Mr. Johnsen selects Mr. Flana-
gan of Toronto as his manager,
Toronto will claim the big black man
as a Torontonian, and if he wins, give
him the freedom of the city, and
public receptions, and start a fund to
educate him, and give him a public
wedding and all that for his nation
of that kind Toronto does not draw
the color line—Albertans.

Services will be held in the Pres-
byterian Church at 11 a.m. Sundays
instead of the afternoon.

Percy Porter met a few of his
friends while in town on Tuesday.

Clark's moving pictures will be
put in the Mercantile Store tonight.
Don't forget them.

The new Sanitarium Hotel is now
being roofed and the long flag-pole
was this week set in position on the
front peak.

A horse ran away on Monday from
the Co-operative with a rig contain-
ing two little children, who had a mil-
lions escape from being killed. One
of the occupants, a child of four
years, leaped from the waggon with-
out sustaining any serious injury,
while the younger child was carried
some distance down the street till
the conveyance brought up against a
telephone pole and was taken out
suburb.

F. M. and Mrs. Pinkney, of Lillie,
were in Blairmore on Tuesday.

Anyone doubting the horticultural
possibilities of this region should
visit the hospital grounds at Cole-
man.

J. W. Glenwright, of Calgary,
representing the Prudential Life
Assurance Co., of which he is the
regional manager, visited Blair-
more this week.

A party of sports drove out to the
Pills near Lundbreck on Sunday,
where the kettle was boiled and a
very pleasant day spent between the
"Vampire Briar bush" and the "allergy
spray."

WANTED—Wives for the six
sons of W. J. Bartlett. State height
and color. No clerical reference
required. Apply T. B. Brandon,
Coleman Miner.

Mr. MacDougall returned to town
from Fischer Creek on Saturday.
Whether, it is said, he had been
looking after some easterners who
contemplate moving from
Opposite to the West.

Make a note of it. On Wednesday
night, July 13th, 10, Charles Riley
McCalley, the well known Oregon
barman, will appear at the Baptist
church, under the auspices of the
Ladies Aid. Let us all hear him.

And God, the popular proprietor
of the Crow's Nest hotel and animal
park, has arranged for a picnic to
take place at his "hole" tomorrow,
and a great many will turn their
backs to Blairmore to enjoy the
Dominion Day at this beautiful spot.

Adverse belonging to the Crow's
Nest hotel and animal park, which
the "hollow" d'pos on Thursday
evening last and bounded up Victor
Glenwright's grass piece. The d'pos
was loaded with logs which snapped
all they struck the bridge at Lion
Creek where the team broke loose
leaving the adjured vehicle behind.

The citizens of Frank, Blairmore
and Bellevue are considering the
matter of building an electric tram
way from Bellevue to Burnstown,
near Coleman. It is said that local
capital has been subscribed and a
new charter will be granted.

A clipping. "Mr. McCalley's
Whitcomb Riley" readings and
violin solos, of "old time melodies"
were received with much applause
while his impersonations were irre-
sistible. Mrs. C. E. Brewster,
chairman com. Olympia Woman's
Club, Olympia, Wash."

The Crow's Nest Flour and Feed
Co. have added a new delivery wa-
gon to their outfit which will great-
ly assist in handling the increasing
trade of this popular firm. The
manager intends to rustle the new
bus and took a dip in Redfern's
Lake last week to loosen up his
limbs.

Two gentlemen from Blairmore
visited Redfern's Lake near Passburg
on Friday last to try their boating
skill, and rowed so hard that the
boats went under, leaving the occu-
pants a-bathing amongst the frogs
and lizards. Through the good
swimming of one and the great height
of the other neither went completely
below the surface and managed to
get the boat to shore. They both
say that Redfern's is an ideal place
for boating or bathing.

Miss Winnie Howard arrived from
Calgary this evening to spend the
summer holidays at home.

Mr. McKenzie and family came to
town by this evening's local.

Mrs. Bert Stemmerson came in from
Lundbreck this afternoon to spend
Dominion Day with her parents.

Dominion Day will be a banner
day for Coleman and Coleman will
dangle about the shades of the "red,
white and blue."

MISERABLE WITH DYSPEPSIA

Another Wonderful Cure By That
Wonderful Fruit Medicine
"Fruit-Active."

Mr. Mathias Dery, of 325 Church street, Ottawa, Ont., was troubled for years by physicians for Painful Dyspepsia. He spent so much money for doctors' medicines without getting much relief that he had about made up his mind that his case was hopeless.

Seeing "Fruit-active" advertised, however, Mr. Dery thought he would invest \$50 in a box of these wonderful fruit juice tablets.

And this famous fruit medicine did for Mr. Dery what all the doctors could not do—it cured him.

He writes:—"Fruit-active" positively cured me of severe Dyspepsia, when physicians failed to relieve me."

"Fruit-active" makes the stomach sweet and clean, insures sound digestion and regulates bowels, kidneys and skin.

\$50 a box, 6 for \$2.50, or trial box, 25¢—all all druggists or from Fruit-active, Limited, Ottawa.

She longed for a new hat. So she began to worry her husband for a new dress.

He: "A new dress! Can't afford it. If you wanted gloves, or a new hat, I wouldn't mind, but a new dress!"

She: "Well, don't get hurried, dear boy! You know I always give in. So just buy me a new hat."

DAME FASHION'S DECREES

MIDSUMMER styles feature garments of linen and of rough silks in suits and dresses. There is a special liking for the rough linens which are converted into two-piece suits, smartly tailored. Not only are these shown in white but in many of the dark tones, such, in fact, as make them adapted for traveling purposes of every day wear.

As to the shape of these garments there is nothing absolutely new to report. The coat with the short length has proved extremely popular with fashionable dressers, and, therefore, with others. At present there seems not the slightest disposition to lengthen the suit coat. As a matter of fact the tendency is in a contrary direction and it now looks as if coats of the persuasion of the pony model of several seasons ago might be carried before a great while. The waist-length coat,

when colorings when the fall garments are brought forward. In lingerie dresses there is noted a considerable use of fine embroidery, delicate combined with Valenciennes, Chantilly and baby Irish crochet lace. These materials are employed quite extensively for misses and juniors' commencement and party frocks. These are very pretty when relieved by broad ribbon sash of pale blue, pink or apricot tone. Bordered cotton marquisettes and batistes are combined with lace insertions and motifs for the fashioning of party frocks for the younger set.

More material than ever before in the history of the trade is being used by the dressmaker, although this may be misleadingly exaggerated. The fact is, however, that the use of materials, and over the other, accounts for phenomenal needs in skirts and dress lengths. It is common for a gown to have three layers—a silk foundation, an interlining of net or gauze and an outer yielding of some transparency. Net is seldom used over silk because of the consequent flat, wallpaper result. And it is not uncommon to find more than one interlining of gauze for the sake of the iridescent effect which is desired.

Three-toned silks in the loveliest chameleon tones are abundant in all the blends that one can think of, but more popular with the dressmaker is the chameleon effect brought out by gauze over gauze until the shimmer of broken tints is what she is looking for. Sometimes five layers of material are used to bring out a rich effect, as, for instance, the foundation silk in black, white or some bright color, white chiffon, orange gold or silver net and black chiffon, and a fancy mesh net over it all.

Valued effects are the leading whim of the hour, and so much so that one finds all sorts of gauze over-dresses and waists in the shops. Chiffon jumper waists with square or round necks and half sleeves come in black or color to match any toilet. They are worn over lingerie waists or gowns or over silk or satin waists or gowns. Gauze tunics, plain or elaborately as could be wanted, with braid and embroidery, are all ready to slip over lingerie, lace or silk gowns.

Chantelle—the pink ermine of a rooster's comb—is a leading tone among trimmings. Buttons engraved with or made in rooster shape are the latest. One of the oddest buttons has a portrait of the famous play writer who is responsible for the craze, and the entire figure of a rooster jeweled elaborately.

Black gauze or lace gowns with bright colored sashes, scarfs and other accessories are one of the prominent fancies for watering places. Vivid green, bright cerise and golden yellow are the most used colors. The gowns are often made over bright linings of the kind, while spangled or jotted black nets, lace or chiffon drape them.

The laces chiefly used for gowns are of the fine silk ones of chintilly or mullin order. The chiffons and nets are braided as elaborately as ever or are embroidered in bold patterns with coarse lines in padded designs. Such embroidery indeed not only trim the silk and fine gauzes, but also lingerie gowns and waists.

The old wheat stalk, which is a variant or direct copy of the course fagot stalk used by convent workers on altar cloths in making wheat ears, is one of the natural developments of the liking for coarse embroidery on fine fabrics. This work, it might be said, goes fast and is possible for the poorest amateur needle. Patterns stamped with novel and other conventional motives are done entirely in this way, except for narrow lines, which are intended to suggest stems

Blue and White Poulard Gown Trimmed with Blue Silk Lace

popularly known as the Eton, is exploited in summer models for misses and young matrons.

Because of the vogue of peasant styles there is a liking just now, for coats of satin and of voile made in Russian effect. Black is the favorite color although for midsummer use there are the little models in white, voile, serge and canvas cloth. As a rule, the trimming consists of collar of satin of the color of the cloth with more or less embroidery in colors. Since the chantelle ermine has set in, not a few of the white coats are piped with red, others have low-rolled collars of red satin.

Very interesting, too, are the new Norfolk coats which are offered as suit accompaniments or as a separate garment for country wear with the skirt of white serge, linen or pique. In color, the coats may be white, navy or a bright red; the trimming of black satin, red satin or foulard, and the belts of patent leather, red or black. The materials most favored are serge and buckraming. These coats are exceedingly smart when worn by the right person at the right time, i.e., by the youthful on the golf links, the stammer or white coaching across country.

For motor wear the long, rather loose coat, of shantung or of changeable taffeta is given the preference. Other fabrics used are glorio, landowne and the coarsely woven linens. The natural fan tones lead and after them the choice appears to be for the leather tones, which are rather smart and which have the advantage of not readily showing the dust. Many of the motor coats are trimmed with foulard, which material forms, also, the lining. For steamer wear there are mannish coats of camel hair blankets, Scotch worsteds and moxer cloths.

So much for the outermost garment which is one of the most important in the summer wardrobe. Mention must be made of the little tunic coats of net, lace and chiffon that are being ordered by fashionable women for wear with evening gowns, and as an accessory for the holiday robe. They are fragile, very charming and very modish.

Summer frocks are extremely simple in their lines and made of exquisite chamois mousselines and chiffons relieved by bands of satin or embroidery. The skirts incline to scant lines, or rather, the front band is very narrow, confining the fulness of the skirt proper closely about the ankles—the width not measuring, in extreme instances, more than one and a quarter yards. These skirts are adaptations, for the most part, of originals introduced early in the season in the French models, or, direct, who has recently gained a reputation for originality combine, with extreme simplicity. Of course his models are not for all women, but on those who can affect them they are charming indeed.

As a rule the blouses that form part of these odd skirts are the simplest representation of simple affairs—but because of the simple effect of the finished garment, the cutting and fitting of the material requires expert fingers and an experienced eye. The beauty of the style is all in the line.

Briefly, the sleeves are short and cut in one with the body of the blouse. The skirt is semi-low and finished with a flat, closely pleated flit of chiffon, white batiste or fine linen or of satin. This trim may also be used for a turn-back cuff on the elbow sleeve. There are no plaits, gathers or other figure motifs on these new blouses; so only those with good figures, slim and well formed, should essay to wear them. Dresses of shantung, voile, foulard, and of the soft cotton fabrics are made in the Polart style for summer exploitation.

Separate blouses follow the lines of the dress bodices. They are attractively simple in effect. Some waist bodices are made of figured chiffon voile as being more durable than the chiffon or chiffon cloth. The foundation color matches the skirt and the figure may be white or of a harmonizing tint. Other models are of the Persian mousselines and chiffon over a lining of plain chiffon or of China silk.

Pouches of the "cachemire"—or Persia—are seen on all manner of garments—coats, blouses, dresses and suits. It has proved a prime favorite with the milliners, too, since it makes a most effective trimming for both small and large hats. It is likely that we shall see a greater use of the Per-

Black and White Poulard Gown

for the dots, which may be worked into cycles or solid spots. The coarsest dress work may easily be accomplished on the gauze and thin silks with great effect for small outlay of time and effort.

Nightgowns have come in again, and very daintily they are. Many materials are used, but fine lawn seems to be the first choice. Made like a baby's cap, fitting snugly around the face, with little white ties under the chin, they are becoming to round-cheeked ladies, especially if the round cheeks are also rosy. A French idea is to use China silk, as that material is supposed to be good for the hair. The cap can be gathered with a little ruffle of the silk or made close fitting and edged with narrow lace. A fascinating little cap made for a bride was of fine Brussels net, oval in shape and pleated at the back of the neck. The border was of two rows of lace insertions, with deep scallops. It was caught together by the scallops and blue satin ribbon, one inch wide, was threaded through the holes. A little rosette of the ribbon, with a bunch of tiny rosebuds, was on top at the right side, and a last coquettish touch was given by a rosette of ribbon and roses under the left ear. Such a cap is, of course, better fitted for dress wear, and ought to be a saluer for the toilet of coqueness, when one's appearance becomes important and occupations are still out of the question.

experimented with swiftly rotating disks of iron. They found that when a disk about seven inches in diameter turned with a peripheral velocity of ten metres per second, it could be cut with a steel tool pressed against it, but that when the velocity was increased to twenty metres per second the iron was unharmed and the steel tool was damaged—At a velocity of sixty metres per second the iron disk even cut quartz and agate.

SAWS WITHOUT TEETH
The employment of circular disks of iron, turning with great velocity, but possessing no teeth on the edge, for sawing metal, has become common in many workshops. Among other places where such saws without teeth are used are the celebrated Krupp gun works, where armor plate is sometimes cut in this manner. The process is not a newly discovered one. As long ago as 1824 Barrie and Colclough, at Geneva,

THURSDAY, JUNE 30, 1910.

Charlie M. O'Brien amused a crowd of citizens here on Sunday afternoon. Very little sympathy was expressed, but perhaps there are some who believe in "Charlie."

On Monday the "spat" between Pug Johnson and Pug Jeffries will take place away down in Nevada. Now we are betting upon the live-winner and saying "I'm up!" but in any case the loser must be a trifle black.

People are getting tired of waiting upon the fulfillment of the charter granted two and a half years ago for the construction of a street railway through the Pass, and feel that it is up to them to make their own local effort, and think it can be done without infringing upon the rights of Coleman.

Prices of Pullmans

The vexed question as to whether upper berths in Pullmans should be sold cheaper than lower ones will be argued this week. The railways and the Pullman Company, represented by the able counsel are prepared to resist any lowering of the rates. They will contend that the matter ought not to be disposed of pending a final judgement upon a similar case before the Inter-State Commerce Commission which is to rehear it.

It is also urged that if the upper are to sell for a rate less than the lower, the latter should be increased to \$2.50 and the other at \$2.

Urged To Establish Power Plant.

That the establishment of a large power plant in the Rocky Mountains should be undertaken by the provincial government from which power might be transmitted to all important points in the province requiring it, is the suggestion by Ald. Clifford E. Jones.

He points out that there is power in abundance in the mountains, and it is merely a question of getting sufficient capital to develop it. This is beyond the reach of private enterprise, but he thinks it could be feasibly handled by the state.

The Alberta Sunday School Association Tour

A number of Sunday School specialists will be in the Pass towns on Saturday and Sunday, July 9th and 10th. Prof. Henry, of Chicago, will conduct the singing. Miss Helen Paik, of Winnipeg, an elementary specialist, will be present, and others.

A mass meeting will be held in the church at Frank on Saturday evening at 7:30. Sunday meetings July 10th: Bellevue, 11 a. m.; Frank, 2 a. m.; Blairmore, 2 p. m.; Coleman at 3 p. m.

An evening of melody and mirth. Let us all turn out on Wednesday night, July 13th, at the Baptist Church to hear Charles Riley McCaffrey, of the Interstate Lyceum and Musical Bureau of Portland, Or. He is an impersonator of considerable note and makes a specialty of James Whitcomb Riley's drivel poems. He is also a violinist of rare natural ability having a touch, tone and an individuality of expression that is soul inspiring. He has plenty of personal recommendations from men of high standing and we are led to believe that we cannot afford to miss it.

Exhibition Entries Closed

The entries for the Provincial Exhibition to be held at Calgary, June 30th to July 7th, have closed and are going to keep the management extremely busy in providing the necessary accommodation.

Following is a comparison of some of the most important entries with those of last year:—

	1910	1909	p. c. inc.
Cattle	431	256	68.36
Horses	775	618	25.89
Sheep & Swine	289	177	63.71
Ag. Products	179	45	87.55

These figures do not include any championship entries. It will be noticed that the increase is very large in each department. In the acre yield competition there are 44 entries. Following is a list of those who are making exhibits in the acre yield competition.

This will undoubtedly be one of the most interesting agricultural features ever seen on an exhibition. John G. Brow, Lloydminster, sp. wheat. Louis Brow, Lloydminster, sp. wheat. W. J. Elliott, Strathmore, sp. wheat, oats and barley. W. J. Glase, Macleod, sp. wheat and winter wheat. Geo. W. Gray, DeWinton, sp. wheat. James Crigg, Conjur Creek, barley and oats. J. C. Hill & Son, Lloydminster, oats. Hugo Knoll, Daysland, oats. G. H. Lait, Medicine Hat, sp. wheat.

Albert Lougheed, Bowden, barley. Walter Moss, Calgary, oats. D. McCrimmon, Carstairs, barley. Robert McKay, Blackfalds, oats. R. Page, Langdon, oats. Dan Patton, Midnapore, oats. Pawson Bros, Coaldale, winter wheat. Arthur Perry, Cardston, winter wheat. Rackham & Smith, Lloydminster, barley, sp. wheat and oats. Francis E. Renaud, Gleichen, barley. W. D. Trago, Gleichen, oats. O. E. Tees, Tees, flax and barley. T. Wilkinson, Strathmore, oats. J. Williamson, Calgary, oats. S. Wolf, Cardston, winter wheat. Bryce Wright, DeWinton, sp. wheat. M. Zimmerman, Medicine Hat, winter wheat. P. A. Switzer, Lacombe, barley. E. J. McArthur, Carstairs, sp. wheat. N. J. Hutton, Carstairs, oats.

Hayes Bros, Carstairs, oats. A. H. Olson, Red Deer, barley. E. H. Byrd, Carstairs, oats. B. M. Pauls, Daysland, flax. G. Passey, Stirling, wheat. O. E. Standford, Didsbury, oats. S. Fead, Innisfail, barley. C. F. Ashmore, Kneehill Valley, wheat. W. A. Burton, Irma, oats. Antoine Bruchet, Lethbridge, sp. wheat. John V. Doak, Clive, oats. A. J. Postell, McEwan, winter wheat. C. L. Wyman, Magrath, winter wheat. Jas. Gregg, Leduc, oats.

The exhibition offices and grounds are now hives of industry, and everything will be ready for the official opening on Dominion Day July 1st.

A large list of rooms has been secured from residents all over the city to assist the hotels in providing accommodation for exhibition visitors. Everything points to the exhibition, being a great success.

For Western Canada's great industrial fair at Winnipeg, Man., July 13 to 23, the Canadian Pacific Railway will have in effect special rates.

The contract has been let for the erection of a sanitarium at Manitou Lake near Watrous.

A chap infuriated by fiery water laid out his spite on his dumb team with the result of a runaway, colliding with a post and the driver taking a spill in the Frank criminal's home. On the rig he sang "I'm a July Good Fellow," in the rearing room. "There's no place like home," and in the police dock "I Guess I'll Pay and Reform."

Strangers find it difficult to locate the Post Office. A magnifying glass should be placed near the railway station for the convenience of the public.

Premier Sifton was yesterday elected in the riding of Yarmouth, with a majority of at least 228. Hon. Mr. Mitchell was returned with over 450 majority at Medicine Hat.

Vessels For Navy Must Be Built In Canada.

Ottawa, June 25.—In the conditions
of the tenders for the construction
of ships for Canada's navy it has
been definitely decided that one of
the requirements shall be that they
be built in Canada. The navy de-
partment will be in a position within
about a month to supply all the ne-
cessary information on which to base
the tenders, and any Canadian or
British firm of established standing
will be given ample opportunity to
submit figures.

The firm of Vickers, Son & Maxson
is now actively preparing to have its
Canadian branch at Montreal in
readiness to undertake the work of
construction next year, if their ten-
der is accepted by the government.

Boy Hanged For Murder

Peterboro, Ont., June 28.—"Lord
Jesus receive my spirit." With this
last appeal to his Maker, Robert
Henderson, aged 17, the young-
est criminal ever executed in Can-
ada, was hanged Thursday morn-
ing. Henderson's crime was
inexcusable and brutal. On January
28 he applied for something to eat
at the home of a couple of maiden
ladies, McPherson by name, living
near Norwood. After being fed he
returned and struck one of them
down with an axe for the purpose
of depriving them of a few cents.
One of the women died shortly after
from her terrible injuries, but her
sister recovered. Henderson was
an English immigrant and since
old enough to do anything had
been addicted to crime. His
mother is still living in Hartlepool,
England.

To Go North Again

Quebec June 26.—Captain Bernier
and the Arctic will probably go
north again during the second week
of July, though the exact date of
sailing is not yet known.

Rapid progress is being made in
provisioning the ship and the
supplies are as usual divided be-
tween the deck and hold, so that in
case of any sudden disaster from ice,
the provisions will not be all down
below.

The crew will be almost exactly
the same as on the last trip. The ex-
act objective point of the expedition
has not been given out and the
steamer, as on other occasions, may
sail with sealed orders, only to be
read in the far north. The Arctic is
being provisioned for two years.

Same Railway

But New Capitalists For Proposed Railway Construction

On the way to Edmonton with
two New York capitalists who
wish to interview the government
in reference to the construction of
a railroad through Pincher Creek
country, Mr. John Herron, M. P.,
of Pincher, is in the city, a guest
of the Alberta hotel. The project
itself is not new, but the capi-
talists are, and after looking over
the country they are so much im-
pressed that they wish to ascertain
what the government will do to-
ward giving a guarantee to the
road.

Of course, as two members of the
cabinet are not yet elected any dis-
cussion of the matter between the
government and the capitalists
would be merely informal. The
route which it is planned to tra-
verse is already covered by two or
three charters. It is hoped to ob-
tain an extension of one of them.

It is said the New York men
have enough money to build 100
miles of the road without any
assistance.

The route proposed runs south-
east from Cowley to Pincher Creek
and thence to Cardston and on to
the international boundary. There
are already railroads within
twelve or fourteen miles of the
boundary line on the other side
and to construct the connecting
link would be a simple matter.

It is planned ultimately to ex-
tend the line northward to Calgary
and southward to Banff and other
Montana cities.

The new Pincher Creek country,
which it is planned to open with
the new road, is probably the best
winter wheat land in Alberta.

Some of it has been held at a
high price for years in the hope
that a railroad will be extended
to it some day.

To Whom it May Concern

Bellevue, Alta., June 28, 1910.
This is to certify that Steve
Humble has this day withdrawn his
interest from the firm of Steve
Humble & Co., and further he will
not in any way be responsible for
any debt or debts incurred from that
date.

THOS. M. BURNETT,
for Steve Humble & Co.
Witness, Florence Vetter.

"It cured me," or "It saved the life of my child," are the expressions you hear every day about Chamberlain's Colic, Cholera and Diarrhoea Remedy. This is true the world over where this valuable remedy has been introduced. No other medicine in use for diarrhoea or bowel complaints has received such general approval. The secret of the success of Chamberlain's Colic, Cholera and Diarrhoea Remedy is that it cures. Sold by dealers everywhere.

Goldwin Smith a Citizen
Of The World, Not
Of Britain

Ithaca, N. Y., June 28.—The late Goldwin Smith, his work and his influence were taken by President Schurman yesterday for the text of his annual address to the graduating class of Cornell University.

"The foundation of Goldwin Smith's political philosophy," said Dr. Schurman, "was the maxim he caught to be carved on the stone seat which he placed on the campus of Cornell University; above all nations in humanity. An Englishman by birth, he was proud of the historic ideals and traditions and loyal to the genuine interests of England, but he sternly refused to identify those interests and ideals with territorial acquisitions, with selfish aggrandizement, with the subjugation and domination of weaker people in Asia and Africa, with unprovoked aggression against the nations of Europe or America, or with reckless and belittling diplomacy which makes it difficult to settle international disputes by means of peace, or by friendly arbitration. It was the moral greatness of England that he persistently championed and that national greatness was, he felt, in essential harmony with the welfare of all mankind."

"The same spirit of world citizenship enabled him to take a dispassionate view of public affairs in the United States and Canada, where he spent the last half of his life. In full sympathy with the democracy of the new world, no man saw more keenly or exposed more clearly the narrow and local selfishness which lies in its bosom, or the blunders and follies into which it may be betrayed by ignorance and passion. Yet democracy was his creed, and he made it his business as a writer, to hold democracy up to its ideal, to lift it above the level of lower forces, from whose influence it can never escape a special vision of the union in some form of English speaking nations, particularly the union of Canada and the United States, and to the furtherance of this he devoted much of his best thought and energy."

"The particular form of union he projected between Canada and the United States may never be realized. The opening of the Canadian Northwest in the twentieth century is the most potent factor in the development of Canadian nationality and it came too late for him to appraise its force. But that the two English-speaking nations on this continent are destined to be drawn more closely together in the future will already appear pretty certain to anyone who considers the implications of that British-American policy which we call the Monroe doctrine and the significance of confronting Canada and the United States on the other side of the Pacific, with all the problems thereof arising of intercourse and emigration of trade, and commerce, or political and religious action and reaction and of national and international prestige recognition."

"Whatever its national destiny may be, Canada has at all events the same international future as the United States. For the future of

both is determined by their location on the American continent, the disconnection with "the politics of Europe" and the consequent political and military alignments of European nations, and their position with the Pacific uniting rather than separating them to the hundreds of millions of Asia who are now developing in to great and powerful nationalities just over the western horizon of California, British Columbia, and Alaska. Those mighty forces operating upon the two kindred American nations can scarcely fail to mold them to a common international destiny. And thus, in substance, if not in form, Goldwin Smith's dream of continental union may be actually fulfilled. With it may also come, if not already rapidly approaching, the final union of all the English speaking nations and their alliance in formal if not informal, for the purpose of maintaining the peace of the world and the settlement of international disputes by the arbitration of the Hague Tribunal, which is at this moment settling for Great Britain and the United States, their century old dispute over their respective rights in the North Atlantic fisheries. Let us at any rate cherish such uplifting visions and dreams.

LILLE NOTES

An interesting children's service was held last Sunday morning in connection with the Sunday School. Mr. W. P. Williams, the esteemed superintendent, presiding, and the address being given by Miss Norton; whilst the children took part in the singing and reciting. In the evening Rev. J. McColl gave a capital sermon, his subject being the "Christian Race."

The Misses Williams, daughters of W. P. Williams, arrived home from college this week for the summer vacation.

Mrs. J. W. May is at present visiting friends in Cranbrook.

Gwilym Evans returned from college this week and paid friends in Lille a visit.

Big Fair Opens To-day

Today the Alberta Provincial Exhibition with its exhibits—mounted by the Hon. P. W. G. Haultain, who was premier of the Northwest Territories for a number of years. A whole array of exhibits and workmen have been busy for some time past and every thing points most favorably to a most successful exhibition.

New Flanager at Coleman

Victoria, June 29th.—R. W. Riddell until recently manager of the British American Trust Company, with headquarters in this city, has been promoted to the position of managing director of the International Coal & Coke Company, Ltd.

Mr. Riddell is well known locally, having for several years been manager of Saunders' grocery establishment and other commercial concerns here. He will now be stationed at Coleman, Alberta, the headquarters of the International Coal & Coke Co., in which concern A. C. Flamerfelt, of this city, is largely interested.

Dominion Day at Coleman

Tomorrow all citizens of the neighboring towns of the Pass will turn their attention to Coleman, where the festal for Dominion Day promise to be both elaborate and enjoyable. Not a stone has been left unturned by the citizens generally, and chiefly the I.O.O.F., to make the day one to be remembered as the greatest field day in Coleman's history. Flamerfelt Park will be opened with a grand array of pomp and an air of merriment. The programme of the day will include sports comprising football, baseball, cricket, foot racing, marathons, etc., for which prizes aggregating \$1,000 will be awarded. Coleman's brass band will render selections during the day and a grand ball will wind up the affair at night.

If you need any printing, don't forget there is a printing office in Blaimore. We are expecting local trade and do not believe in crawling upon that of others.

Brief News Notes

This year, in Alberta, there are 9,294,800 acres sown in wheat.

Many people are moving from California to British Columbia.

George London has shipped 650 sheep from Orville to Vernon.

William Hooper is planting eight acres of unions at Creston.

Sir Wilfrid Laurier will spend an hour in Golden on August 15.

P. Burns & Co. are shipping cattle from Gleichen to England.

The Okanagan will produce over 500 carloads of fruit this summer.

The Canadian Bank of Commerce will build a \$200,000 brick structure in east Calgary.

Over 1,000 immigrants arrived at Winnipeg on Sunday last, mostly British, Russian and Scandinavian.

E. E. Parsons has bought the steam laundry at Orville and many of the inhabitants are now buying white shirts.

For timber limits at Three Valley and the sawmill of the Blunday Lumber Co., an English company has paid 1,250,000.

An Oregon company is farming 14,000 acres in Alberta. The company expects to thresh 300,000 bushels of wheat every year.

The station at Watson, Sask., was struck by lightning on Saturday last and very badly wrecked. Two men in the building at the time were rendered unconscious, but soon recovered, receiving only a few slight burns.

Hay Growers Organize

Pincher Creek, June 22.—A company of hay growers has been organized in Pincher Creek, Alberta, for the purpose of handling their own hay and farm produce and placing it on the market in better shape than heretofore.

The company propose to make strict grading rules and guarantee all their products and this will no doubt be an advantage both to the consumer and the company and do away with a great deal of dissatisfaction that has been experienced in the past, especially regarding hay. They have styled themselves the South Alberta Hay Growers Limited, with head office in Pincher Creek and have elected John Kenning president; A. Pelletier, president; and E. G. Ambrose, secretary treasurer.
